

Simulation Inputs:

a: 35.1535 inch ** 2 / pound

n: 0.65

m: -0.2

Initial Oxidiser Volume: 1 liter

External Temp: 85 degF

Grain Diameter: 1.7500 inch

Initial Port Diameter: 1.2 inch

Port Length: 15 inch

Fuel Density: 0.000143 pound / inch ** 3

Injector Mass Flow Rate: 0.3307 pound / second

Number of Injectors: 1

Ideal O/F Ratio: 4.83

Time Step: 0.001 second

Simulation Results:

Total Burn Time: 1.021 second

Impulse: 521.19 newton * second

Average Thrust: 510.47 newton

Motor Code: I

Motor: I510

average fuel mass flow rate (pound / second) vs time (second)

average fuel mass flow rate (pound / second) vs time (second)

average fuel mass flow rate (pound / second) vs time (second)

average fuel mass flow rate (pound / second) vs time (second)

average fuel mass flow rate (pound / second) vs time (second)

ideal nozzle exit area (inch ** 2) vs time (second)

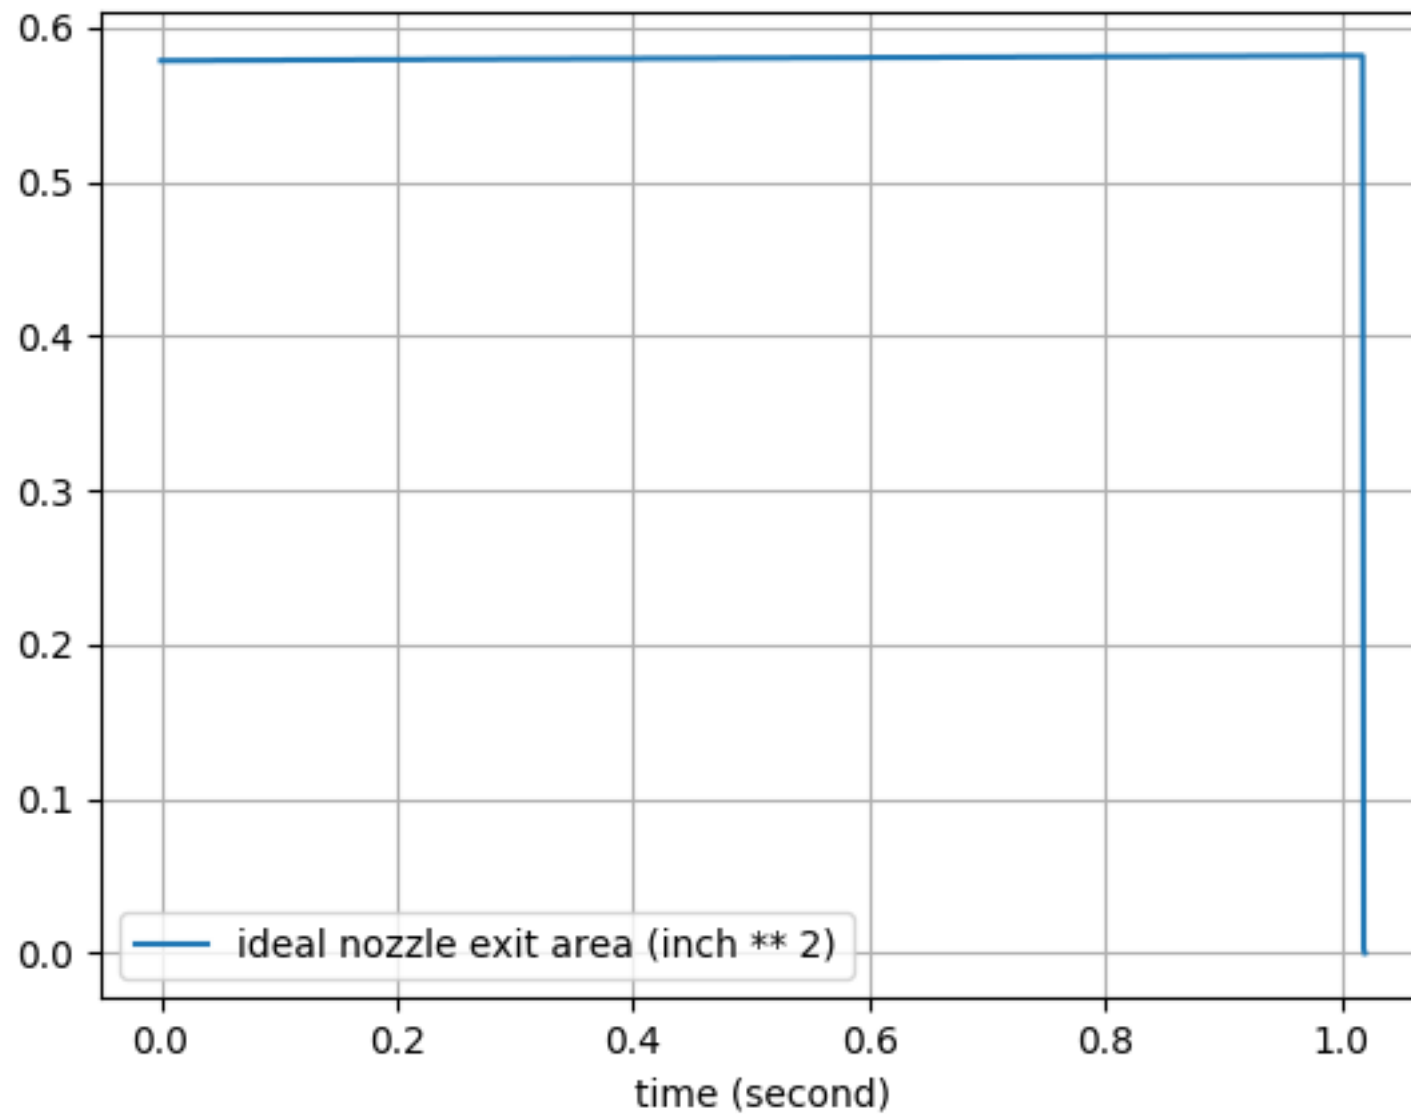

ideal nozzle exit area (inch ** 2) vs time (second)

ideal nozzle exit area (inch ** 2) vs time (second)

ideal nozzle exit area (inch ** 2) vs time (second)

ideal nozzle exit area (inch ** 2) vs time (second)

ideal nozzle exit area (inch ** 2) vs time (second)

ideal nozzle exit area (inch ** 2) vs time (second)

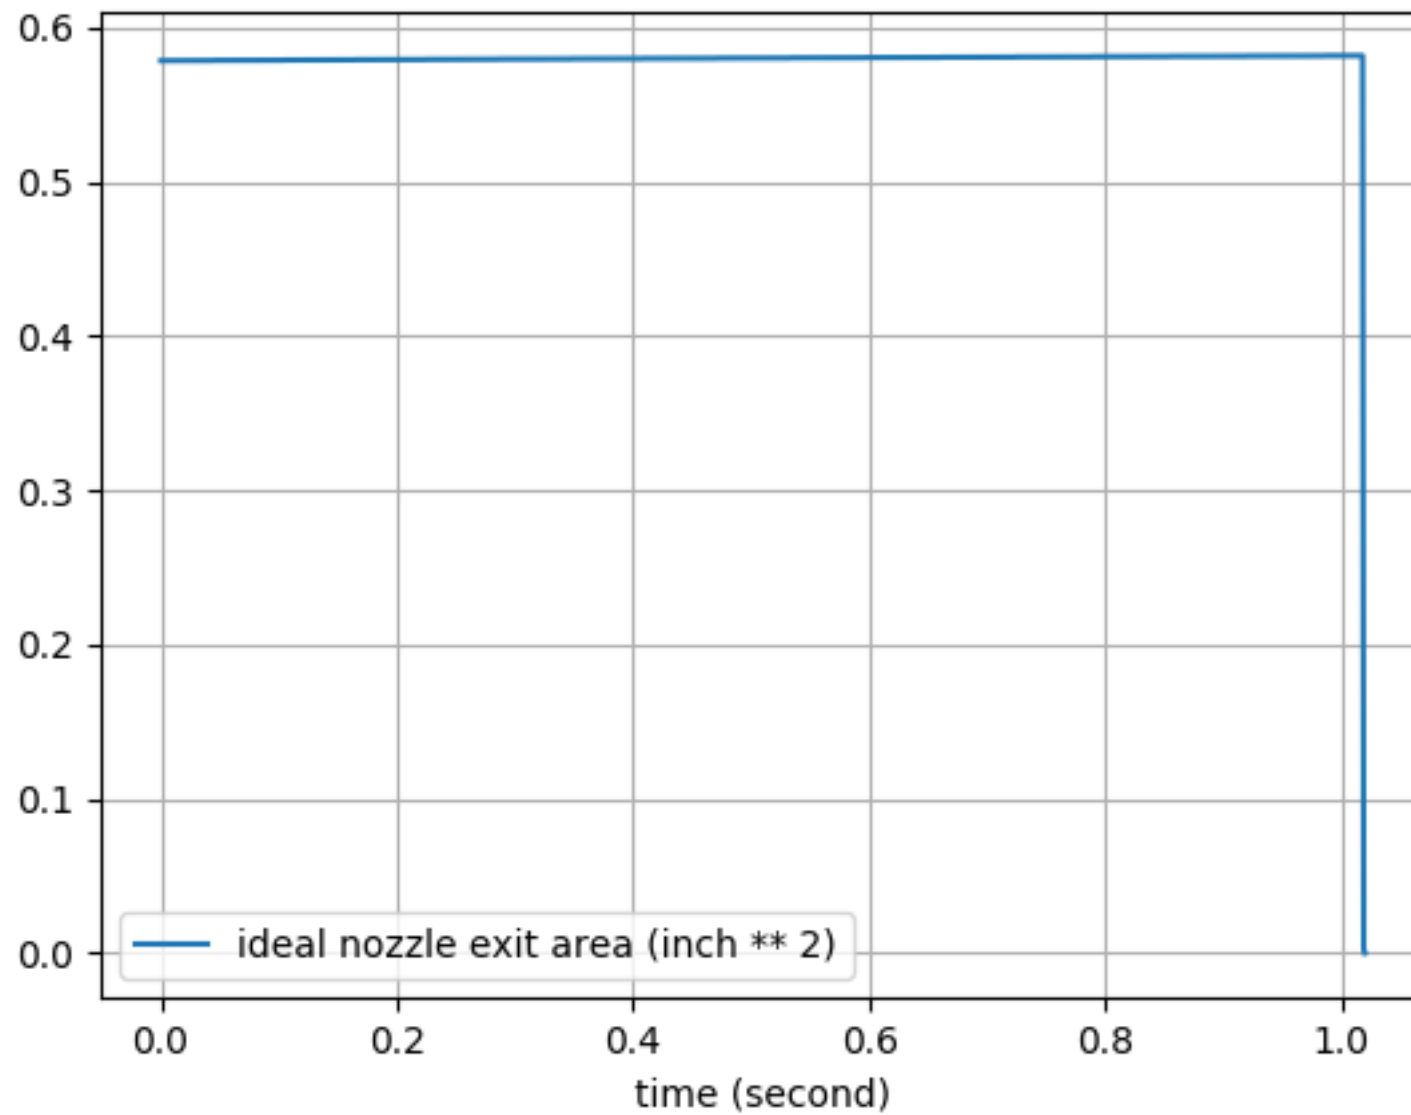

ideal nozzle exit area (inch ** 2) vs time (second)

ideal nozzle exit area (inch ** 2) vs time (second)

ideal nozzle exit area (inch ** 2) vs time (second)
